ELSEVIER

European Journal of Operational Research 100 (1997) 642–644

EUROPEAN
JOURNAL
OF OPERATIONAL
RESEARCH

Contents Volume 100

1 Prediction of company acquisition in Greece by means of the rough set approach
R. Słowiński, C. Zopounidis and A.I. Dimitras

16 Evaluating foreign investment environment in China: A matrix approach
S. Deng, Y. Li and J. Chen

27 Portfolio optimization with a neural network implementation of the coherent market hypothesis
M. Steiner and H.-G. Wittkemper

41 Currency option pricing with mean reversion and uncovered interest parity: A revision of the Garman–Kohlhagen model
N. Ekvall, L.P. Jennergren and B. Näslund

60 The confounding effects of distribution mixtures on some basic methods for handling stable-Paretian distributions
H.-S. Lau and A.H.L. Lau

72 Using the Analytic Hierarchy Process and multi-objective programming for the selection of cost drivers in activity-based costing
M.J. Schniederjans and T. Garvin

81 Cost models in nonhomogeneous Markov systems
A.C. Georgiou and P.-C.G. Vassiliou

97 Project network models with discounted cash flows a guided tour through recent developments
W.S. Herroelen, P. Van Dommelen and E.L. Demeulemeester

122 Critical path in an activity network with time constraints
Y.-L. Chen, D. Rinks and K. Tang

134 A genetic algorithm for multi-mode resource constrained project scheduling problem
M. Mori and C.C. Tseng

142 Process planning in a fuzzy environment
M.L. Liu and N.V. Sahinidis

170 Finite-capacity scheduling-based planning for revenue-based capacity management
C. Akkan

180 A tabu search algorithm for the multi-trip vehicle routing and scheduling problem
J. Brandão and A. Mercer

192 Complex dynamics and control of arms race
D.A. Behrens, G. Feichtinger and A. Prskawetz

216 A simulation approach to reliability analysis of weapon systems
J. Yáñez, T. Ortuño and B. Vitoriano

225 Stochastic modelling of combat with reinforcement
N.K. Jaiswal, Y. Sangeeta and S.C. Gaur

236 Optimal strategy of route and look for the path constrained search problem with reward criterion
R. Hohzaki and K. Iida

Feature Issue: Models and Methods for an Integrated Design of Products and Processes

251 Models and Methods for an Integrated Design of Products and Processes
W. Eversheim

253 Information management for concurrent engineering
W. Eversheim, A. Roggatz, H.-J. Zimmermann and T. Derichs

266 A flexible concept for decision support: Evaluation and selection of suitable product development activities
H. Ahn and H. Dyckhoff

277 A methodology for the reduction of imprecision in the engineering process
R.E. Giachetti, R.E. Young, A. Roggatz, W. Eversheim and G. Perrone
293 The implementation of simultaneous engineering in the stage of product concept development: A process orientated improvement of quality function deployment
R. Schmidt
315 Intelligent systems for engineering design and configuration problems
K. Müller and H.-J. Sebastian
327 Simultaneous engineering approach to an integrated design and process planning
W. Eversheim, W. Bochtler, R. Gräßler and W. Kölscheid
338 Feature based feedback into the early stages of design
H. Dürr and M. Schramm
351 Evaluating alternative production cycles using the extended fuzzy AHP method
M. Weck, F. Klocke, H. Schell and E. Rüenauver
367 Potentials and procedure for the integrated planning of production technologies in the early phases of product development
W. Eversheim, F. Klocke, W. Schmitz, F. Brandenburg and N. Winands
379 Concurrent engineering of work and production systems
J. Stahl, H. Luczak, R. Langen, M. Weck, P. Klonaris and T. Pfeifer

399 The mixed and multi model line balancing problem: a comparison
J.I. van Zante-de Fokkert and T.G. de Kok
413 Optimal production cycles, procurement schedules, and joint investment in an imperfect production system
J.-D. Hong
429 On the use of the asymptotic forms of the Boolean matrix for designing cellular manufacturing systems — An improved approach
G.J. Nair and T.T. Narendran
441 A global MILP model for FMS scheduling
J. Liu and B.L. MacCarthy
454 On a pattern sequencing problem to minimize the maximum number of open stacks
H.H. Yanasse
464 Scheduling jobs on parallel machines with sequence-dependent setup times
Y.H. Lee and M. Pinedo
475 Real time task scheduling allowing fuzzy due dates
M. Litoiu and R. Tadei
482 Robust economic order quantity models
G. Yu
494 Solving the discrete lotsizing and scheduling problem with sequence dependent set-up costs and set-up times using the Travelling Salesman Problem with time windows
M. Salomon, M.M. Solomon, L.N. Van Wassenhove, Y. Dumas and S. Dauzère-Pérès
514 A dynamic lot sizing model with exponential machine breakdowns
H. Kuhn
537 Dynamic lot-sizing with setup cost reduction
M. Denizel, S. Erengüç and H.P. Benson
550 An optimal (Q,r) policy for a multipart assembly system under stochastic part procurement lead times
O. Fujiwara and D. Sedarage
557 Simple formulas for the expected costs in the newsboy problem: An educational note
H.-S. Lau
562 The single-item newsboy problem with dual performance measures and quantity discounts
C.-S. Lin and D.E. Kroll
566 On the lexicographic minimax approach to location problems
W. Ogryczak
586 An adaptation of SH heuristic to the location set covering problem
M. Almiñana and J.T. Pastor
594 Generalized p-Center problems: Complexity results and approximation algorithms
D.S. Hochbaum and A. Pathria
608 A bi-objective uncapacitated facility location problem
Y.-S. Myung, H.-g. Kim and D.-w. Tcha
617 A linear program for the two-hub location problem
J. Sohn and S. Park

623 The splitting of variables and constraints in the formulation of integer programming models
H.P. Williams and S.C. Brailsford
629 Scaling units via the canonical correlation analysis in the DEA context
L. Friedman and Z. Sinuany-Stern
638 A response to ''A comment on 'Grey integer programming: An application to waste management planning under uncertainty''' by Larry Jenkins
G.H. Huang, B.W. Baetz and G.G. Patry
642 Contents Volume 100
